32 X 10 FR	PER 2M LENGTH	42

Product Code		LENGTHS PER CARTON
16 X 13 FR	PER 2M LENGTH	28
19 X 13 FR	PER 2M LENGTH	24
25 X 13 FR	PER 2M LENGTH	15
32 X 13 FR	PER 2M LENGTH	30

Don't forget that all heating pipe needs insulating and our new SuperlonFR is stronger & easier to use and is perfect for the job. SuperlonFR is a **fire rated** yet flexible lightweight elastomeric nitrile rubber material designed for thermal insulation. Made with more powder each length is now easier to slide onto the pipe. SuperlonFR reduces heat loss for hot water plumbing and hydronic heating pipes. SuperlonFR is suitable for applications within the temperature range of minus 40°C to 105°C. Also acts as an excellent protector against ultraviolet light and will not cause any skin allergies. For more information please contact one of our sales team.

**Sizes available are:** 16mm, 19mm, 25mm & 32mm (inside diameter) with a 10mm or 13mm wall thickness. All available in 2m lengths.
