NEW MODULAR MANIFOLDS FOR UNDERFLOOR HEATING

Made in Germany Uponor's modular plastic manifolds are another quality addition to Hunt Heating's latest product range. Offering cost effective solutions to copper, brass and other metal alternatives this durable material will never bend. Made to order these lightweight manifolds are simple to use and can be extended at any time. Attached flow meters provide fast and easy balancing. Simply screw that brackets onto the manifold mount or wall and snap the manifold into place.

IMPORTANT: THE FLOW MODULES ARE INDICATED BY THE RED ADJUSTABLE FLOW VALVES. THE RETURN MODULES HAVE THE WHITE REMOVABLE CAPS FOR ACTUATORS. FLOW & RETURN MODULES CAN BE SWAPPED AT ANY STAGE BY UNCLIPPING THEM FROM THE BRACKETS.

FEATURES

- Made from a high performance polyamide material.
- Full accessories available with built in flow meters.
4 lt/min max
- Quick & easy modular construction. Up to 12 circuits (100m circuits)
- Made to order before delivery

(the oxygen barrier materials)
